

Bob is a Dutch Shepherd born in Holland in 2006. From there he was taken to Texas and was brought to Puerto Rico in 2010. Bob is trained in Explosives Detection. He is strong and with great stamina. What is most impressive, however, is his speed. He is able to catch the odor quickly, zone in and maintain his focus as he passively alerts. He is an unstoppable working machine with super ball drive. Bob is a great asset to Winstar Nightwatch Kennel. We will soon be adding him to our breeding program to pass those genes to his offsprings. This will assure that we maintain his characteristics for the future. [See Video](#)
